Why you dont offer group classes?

My commitment to you is that you really learn how to apply makeup for YOUR type of face, eyes etc. by following a visagism. When we have more people in this class, these people will have other characteristics which can divide my attention that I would have with you and in some cases courses in groups end up becoming a general class, where in the end you end up learning only superficially.

Makeup is a personalized art, we can not generalize the methods because each person has a different need, difficulty and shapes.

Many courses in groups also end up becoming a makeup party, where the intention ends up being fun and not the knowledge itself, which is not my purpose in this class.

Terms and conditions:

- It's not allowed to have any other person during the classes.
- It's not allowed to record the classes except steps when necessary
 - The course will be only confirmed when fully paid
